SUBJECT INDEX

- | | |
|--------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Alkali metal | Cage compounds |
| Alkylphosphoric acid armed crown ethers having a specific cation binding ability 97 | Transition-metal-directed assembly of well-defined organic architectures possessing large voids: from macrocycles to [2]catenanes 249 |
| 1,10-Phenanthroline derivatives as ionophores for alkali metal ions 285 | Catenanes |
| Artificial-signaling receptors | Transition-metal-directed assembly of well-defined organic architectures possessing large voids: from macrocycles to [2]catenanes 249 |
| artificial-signaling receptors for biologically important chemical species 265 | Cation binding |
| Aza-macrocyclic ligands | Cation binding by thallium(I) selective crown ethers 171 |
| Carbon dioxide activation by aza-macrocyclic complexes 221 | Chiral azophenolic crown ether |
| | Preparation of chiral and <i>meso</i> -crown ethers incorporating cyclohexane-1,2-diol derivatives as a steric barrier and their complexation with chiral and achiral amines 199 |
| Bacteriochlorophylls | Chiral crown ether |
| Supramolecular structure in extramembraneous antennae of green photosynthetic bacteria 183 | Preparation of chiral and <i>meso</i> -crown ethers incorporating cyclohexane-1,2-diol deriva- |

- tives as a steric barrier and their complexation with chiral and achiral amines 199
- Chlorosomes**
Supramolecular structure in extramembraneous antennae of green photosynthetic bacteria 183
- CO₂**
Carbon dioxide activation by aza-macrocyclic complexes 221
- Complex**
New class of lithium ion selective crown ethers with bulky decalin subunits 135
- Crown ether**
Armed crown ether complexes in supramolecular assembly 1
Photocontrol of ionic conduction by photochromic crown ethers 41
Alkylphosphoric acid armed crown ethers having a specific cation binding ability 97
New class of lithium ion selective crown ethers with bulky decalin subunits 135
Cation binding by thallium(I) selective crown ethers 171
Preparation of chiral and *meso*-crown ethers incorporating cyclohexane-1,2-diol derivatives as a steric barrier and their complexation with chiral and achiral amines 199
- 14-Crown-4**
New class of lithium ion selective crown ethers with bulky decalin subunits 135
- Cyclodextrins**
Preparation and structures of supramolecules between cyclodextrins and polymers 115
- Diastereotopic face selectivity in complexation**
Preparation of chiral and *meso*-crown ethers incorporating cyclohexane-1,2-diol derivatives as a steric barrier and their complexation with chiral and achiral amines 199
- Electroinduced activation**
Carbon dioxide activation by aza-macrocyclic complexes 221
- Enantioselectivity in complexation**
Preparation of chiral and *meso*-crown ethers incorporating cyclohexane-1,2-diol derivatives as a steric barrier and their complexation with chiral and achiral amines 199
- Extramembraneous antennae**
Supramolecular structure in extramembraneous antennae of green photosynthetic bacteria 183
- Gold(III) porphyrin**
Transition metal-assembled multiporphyrinic systems as models of photosynthetic reaction centre 63
- Host-guest chemistry**
Macrocyclic pseudopeptides containing *N,N'*-ethylene-bridged-dipeptide units: synthesis, binding properties toward metal and organic ammonium cations, and conformations. The first step in designing artificial metalloproteins 301
Outer-sphere and inner-sphere complexation of cations by the natural ionophore lasalocid *A* 349
- Intramolecular electron transfer**
Transition metal-assembled multiporphyrinic systems as models of photosynthetic reaction centre 63
- Ion-selective electrode**
New class of lithium ion selective crown ethers with bulky decalin subunits 135
- Ionic conduction**
Photocontrol of ionic conduction by photochromic crown ethers 41
- Ionophores**
Synthesis and metallophilic properties of troponoid thiocrown ethers 71
1,10-Phenanthroline derivatives as ionophores for alkali metal ions 285
- Ion recognition**
Regulation of ion recognition by utilizing information at molecular level 151
- Lasalocid *A***
Outer-sphere and inner-sphere complexation of cations by the natural ionophore lasalocid *A* 349
- Macrocycles**
Transition-metal-directed assembly of well-defined organic architectures possessing large voids: from macrocycles to [2]catenanes 249
- Macrocyclic peptides**
Macrocyclic pseudopeptides containing *N,N'*-ethylene-bridged-dipeptide units: synthesis, binding properties toward metal and organic ammonium cations, and conformations. The first step in designing artificial metalloproteins 301

Macrocyclic pseudopeptides

Macrocyclic pseudopeptides containing *N,N'*-ethylene-bridged-dipeptide units: synthesis, binding properties toward metal and organic ammonium cations, and conformations. The first step in designing artificial metallo-proteins 301

Metal-ion selectivity

Macrocyclic ligands with pendent amide and alcoholic oxygen donor groups 315

Model of photosynthetic reaction centre

Transition metal-assembled multiporphyrinic systems as models of photosynthetic reaction centre 63

Multidentate ligand

Macrocyclic ligands with pendent amide and alcoholic oxygen donor groups 315

Neutral oxygen donor

Macrocyclic ligands with pendent amide and alcoholic oxygen donor groups 315

Oxygen donor group

Macrocyclic ligands with pendent amide and alcoholic oxygen donor groups 315

Palladium complexes

Transition-metal-directed assembly of well-defined organic architectures possessing large voids: from macrocycles to [2]catenanes 249

Pendant donor ligand

Macrocyclic ligands with pendent amide and alcoholic oxygen donor groups 315

Phosphoric acid

Alkylphosphoric acid armed crown ethers having a specific cation binding ability 97

Photocatalysis

Carbon dioxide activation by aza-macrocyclic complexes 221

Photochromic crown ethers

Photocontrol of ionic conduction by photochromic crown ethers 41

1,10-Phenanthroline

1,10-Phenanthroline derivatives as ionophores for alkali metal ions 285

Photosynthetic bacteria

Supramolecular structure in extramembraneous antennae of green photosynthetic bacteria 183

Polymers

Preparation and structures of supramolecules between cyclodextrins and polymers 115

Reduction

Carbon dioxide activation by aza-macrocyclic complexes 221

Ruthenium(II) bis-terpyridine

Transition metal-assembled multiporphyrinic systems as models of photosynthetic reaction centre 63

Self-aggregates

Supramolecular structure in extramembraneous antennae of green photosynthetic bacteria 183

Self-assembly

Transition-metal-directed assembly of well-defined organic architectures possessing large voids: from macrocycles to [2]catenanes 249

Solvent extraction

Cation binding by thallium(I) selective crown ethers 171

Supramolecular assemblies

Armed crown ether complexes in supramolecular assembly 1

Supramolecular structures

Supramolecular structure in extramembraneous antennae of green photosynthetic bacteria 183

Supramolecules

Preparation and structures of supramolecules between cyclodextrins and polymers 115

Transition-metal-directed assembly of well-defined organic architectures possessing large voids: from macrocycles to [2]catenanes 249

Transport

Alkylphosphoric acid armed crown ethers having a specific cation binding ability 97

Triad

Transition metal-assembled multiporphyrinic systems as models of photosynthetic reaction centre 63

Troponoid thiocrown ethers

Synthesis and metallophilic properties of troponoid thiocrown ethers 71

Zn(II) porphyrin

Transition metal-assembled multiporphyrinic systems as models of photosynthetic reaction centre 63
